INTRODUCTION

For over a quarter of a century—Barcalo Drop Forged Tools have been manufactured according to our high standard of quality and uniformity. Today—volume users are sending orders for these fine popular priced tools—from South Africa, Australia, South America, the Orient and every other part of the globe.

The reason is found in the tools themselves. They are made from fine grade special analysis tool steels and alloy steels. Each tool is forged for the job that the tool must do. Each product is scientifically heat-treated by latest methods.

It pays to handle a line like the Barcalo Drop Forged grade—a line that's up and coming—constantly gaining in prestige and every year becoming more valuable to its jobbers. We should like to serve you.

Barcalo Manufacturing Company

225 Louisiana Street
Buffalo, N. Y., U.S.A.

CATALOG No. 28
NOVEMBER, 1940

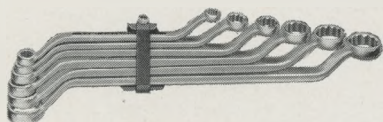

Printed in U.S.A.

BARCALO FORGED STEEL 12-POINT BOX WRENCH SETS

The newly designed Barcalo 12-point Box End Wrenches securely grip all nuts, eliminating slippage and rounding of corners. The great strength and toughness of our special analysis tool steel permits our using thin head walls for difficult work in close quarters. The raised panel adds to the attractive design and provides space for branding. All wrenches are drop forged, carefully hardened and broached (machined). Available in a great variety of sizes, styles and finishes.

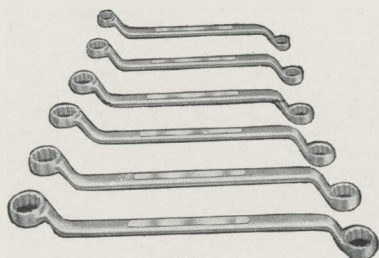

All wrenches below are in the 45° style.

BARCALO CHROME VANADIUM COMBINATION BOX AND OPEN END WRENCHES

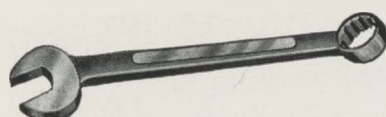

No. 1218

The new Barcalo Combination Wrench is a dual purpose one, combining in one tool two types of opening, box and open end. The great strength and toughness of Chrome Vanadium steel (S.A.E. 6140) permits our using thin head walls for difficult work in close quarters. These attractive service wrenches find a wide range of use and are especially adapted for carburetor, manifold, clutch, generator and starter work. The raised panel adds to the attractiveness and provides space for branding.

Supplied in the nine popular sizes suitable for general service work.

All wrenches below are in the **Cadmium finish** with Ends Polished Bright.

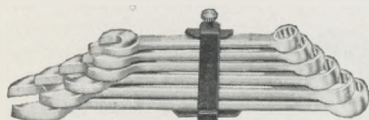

No. 1215

Attractive displays featuring Barcalo 12-point Combination Wrenches and Combination Wrench Sets as illustrated on page 26.

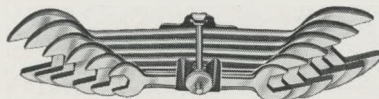

BARCALO DOUBLE GRIP OPEN END WRENCH SETS

The streamlined design of Barcalo Double Grip Open End Wrenches is entirely distinctive as it permits a four-way (double) grip on the nut. Jaws have been thinned to permit use in tight places and wrenches lengthened for greater leverage. The raised panel increases the attractive appearance of the wrench and provides space for branding. Drop forged from special analysis tool steel, carefully machined and hardened.

BARCALO CHROME MOLYBDENUM OPEN END WRENCHES

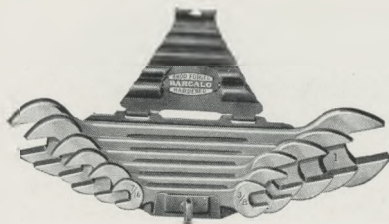

No. 5027

This wrench is drop forged from a high grade of Chrome Molybdenum steel to insure the strength and toughness required in a tool of this character. The thin jaws and extra length warrant its use in close quarters where greater leverage means an easier operation. In every stage of manufacture great care is used to produce this wrench. It carries our unqualified guarantee.

BARCALO STARTER AND MANIFOLD WRENCHES

Forged from a special analysis tool steel, these wrenches are time-saving tools. They replace many special, costly wrenches. Combine 12 point popular openings of $\frac{5}{8}$ " and $\frac{9}{16}$ " and $\frac{5}{8}$ " and $\frac{3}{4}$ ". The $\frac{5}{8}$ " opening fits Buick heat traps and carburetors, Hudson starter and manifold nuts on Chevrolet, Oldsmobile, Ford, Pontiac and other cars. The $\frac{3}{4}$ " opening takes care of the starter nuts on cars later than 1937. These popular combinations of openings adapt the wrenches to many applications.

No. 146

BARCALO RADIO PLIERS

Here is a light, perfectly balanced tool, specially designed for work on radios and similar apparatus. The counter-sunk flush bolt gives these pliers smooth sides, thus preventing interference when working in tight places. Besides being long and tapered, the nose is rounded for making loops in wires, getting into narrow spaces, and other practical work on radio apparatus. The wire cutter on these pliers is hardened and cuts clean and flush.

Handy Gadget.
Petticoat Sets.

By MARY WELLS RIDLEY.

INGENIOUS INVENTION: This department rarely makes predictions. But on this occasion we gladly stick our neck out and declare that the little contraption pictured—which looks like a flying squirrel nibbling at a tin can—will make gadget history. Called the 7-in-1 All-Use-Tool, it does everything, just everything. Opens cans in a new, superior fashion; hammers nails; unscrews any bottle cap from ketchup to a gallon can of oil; tightens 'em on afterward; twists a pouring-lip on a can with one easy gesture; cuts through labels, paper, bottle cap seals; peels oranges; pries up the pressed-down type of can lid; opens regular capped bottles; does a nifty screw-driving job. And sells for 25 cents!

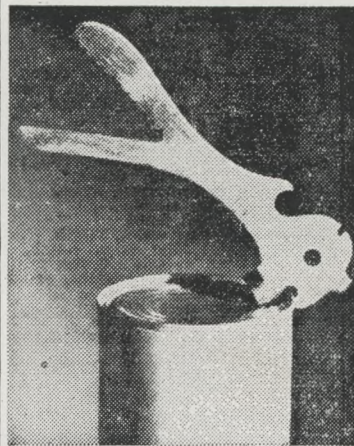

Its inventor is no other than John B. Smiley, former president of Remington Arms, who spent a year and a half perfecting his brainchild and who's pleased as punch about its versatility.

Mr. Smiley, who says this is his first real invention, declared yesterday that he got the idea after watching a man trying to uncap a gallon can of oil one day.

"There ought to be a simpler way of doing that—and a lot of other things," he decided.

You'll notice the smooth edges, the nicely balanced weight of this one-piece tool chest that Mr. Smiley worked out with loving care. Lewis & Conger have taken it on, and so have Kresge's.

If you're indebted to a bartender, a Boy Scout, a sportsman, a maiden aunt, a career woman or just your husband, this is the little gift that'll square everything
